True Color CRM: Contact to Sales Order

Demo journey guide: every step, who is responsible, and the conditions the system checks. Prepared 21 Oct 2026.

The journey at a glance

Contact Pool → **Lead** → **Opportunity** → **Quotation** → **Approval** → **Customer acceptance** → **Sales Order** → **Sales Contract** → **Dispatch & Delivery** → **Installation** → **Completed**

Data is entered once and carried forward automatically. Each hand-off sends a notification (bell icon) to the next responsible person.

Who does what (demo users)

There are no passwords: choose a demo user on the login screen. Management and Administrator users also confirm a one-time code, which is shown on screen.

Person	Role	Responsibility in this journey
Karan Singh	Sales Executive – Textile	Owns the deal: contact, lead, opportunity, quotation, sales order, contract
Rohan Desai	Regional Sales Manager – Textile (Karan's manager)	Approval level 1: quotation discounts and sales orders
Suresh Iyer	GM Sales – Textile (Division Head)	Approval level 2: higher discounts
Vikram Shah / Anjali Kapoor	MD / CFO & Director (Management)	Approval level 3: largest discounts
Swati Deshmukh	Accounts Manager	Finance check on sales orders, payment receipts
Rajesh Agarwal	Import Head (SCM)	Order processing, ready for dispatch, dispatch
Meera Iyer	Service Coordinator	Dispatch, delivery, installation

Visibility: Sales Executive sees own records · Sales Manager sees the team · Division Head sees the division · Management sees everything. Nobody can approve their own request.

Step-by-step

Step 1: Contact Pool → Lead Karan

1. Sign in as Karan and open **Contact Pool**. Add a contact, or use an existing one.
2. Click **Convert to Lead** and fill in the required fields:
   - Division, Product type, Lead owner, Lead source
   - Next follow-up date (today or later)
   - Source = Exhibition → event name required · Source = Referral → referrer type and person required
   - Contact without a company → company name, territory and state required (filled from the city where possible)

System result: company created as *Prospect* with a billing address · lead created with status **New** · contact marked *Converted* (can't be converted twice) · owner notified.

Step 2: Lead New → Contacted Karan

- Open the lead and click **Log Follow-up**. The **next follow-up date is mandatory** and can't be in the past.
- The first logged activity moves the lead to **Contacted** automatically. There is no manual "mark contacted".
- Other outcomes: **Nurture** (needs a future re-contact date) or **Disqualify** (reason required; "Other" needs a note of at least 5 characters).

> **SLA:** a lead not contacted within **24 hours** is escalated to the reporting manager and listed under **Not Attended Leads**.

Step 3: Lead → Opportunity Karan

- Click **Create Opportunity**. Allowed only when the lead is **Contacted** (not New).
- Required (BANT): requirement, budget (more than ₹0), decision maker, purchase timeline, opportunity name, expected value (more than ₹0), expected close date (not in the past).

System result: opportunity created at **Needs Assessment** (10%) with all lead data carried over · lead becomes **Qualified** and read-only · referrer (if any) notified.

Step 4: Move the opportunity through the pipeline `Karan`

Use the **Pipeline** Kanban (drag and drop) or the opportunity record.

Stage	Probability	Condition to enter
Needs Assessment	10%	none
Demo / Sample	25%	none (book a demo or sample print here)
Proposal / Quotation	50%	Value must be more than ₹0
Negotiation	75%	At least one quotation must exist
Won	100%	Needs an accepted quotation (set automatically on acceptance)
Lost	0%	Lost reason and competitor lost to are mandatory

An opportunity with no update for 14 days raises a stagnation alert.

Step 5: Create the quotation `Karan`

- From the opportunity, create a **Quotation** and add at least one product line.
- Prices come from the price list. Sales users **can't edit list prices**; they can give a discount.
- GST is calculated automatically (CGST + SGST within the state, IGST outside).
- A quotation can't be created on an opportunity that is already Won or Lost.

Step 6: Submit for Approval `Karan → approvers`

Click **Submit for Approval**. The validity date must not have passed, and a reason (at least 5 characters) is needed when there is a discount. The highest line discount decides who approves:

Highest line discount	Approval chain
Up to 5%	**Approved automatically**
5% – 10%	Rohan (Sales Manager)
10% – 15%	Rohan → Suresh (GM)
Above 15%	Rohan → Suresh → Vikram / Anjali (Management)

- Approvers work from **Quotations** → **Pending Approvals**. Rejecting needs a note of at least 5 characters.
- While the quote is pending, Karan can **Pull Back to Draft** to change it.

> **Demo tip:** use a discount of about 12% so the two-level approval (Rohan, then Suresh) shows.

Step 7: Send the quotation and record acceptance Karan

1. **Send Quotation** by email or WhatsApp. The contact must have consent for that channel, and the quote must not be expired.
2. **Mark Accepted** by one of two methods:
   - **PO upload:** PO number, PO date (not in the future), PO file
   - **Electronic acceptance:** name of the person who accepted

System result: quotation becomes **Accepted** · opportunity becomes **Won** at the quotation value · other open quotations become *Not Selected*. Only one quotation can be accepted per opportunity.

Step 8: Generate Sales Order Karan

- Click **Generate Sales Order** on the quotation or opportunity. Customer, products, rates and terms are filled in from the quotation.
- **Mandatory:** customer PO number, PO date and PO file. Machine orders also need an **installation site**.
- An order can also be created directly from an Approved or Sent quotation: the PO on the order counts as acceptance.
- One won opportunity can have only one live sales order.

System result: order created with status **Pending Approval**.

Step 9: Sales order approval Rohan (+ Swati)

- **Level 1:** the order owner's reporting manager (Rohan).
- **Finance check by Accounts (Swati)** is added when the advance is below **30%** or the customer has overdue amounts.
- Price changes beyond a **2%** tolerance send the order back for re-approval.

System result: status becomes **Confirmed** (or **Payment Pending** if the advance is unpaid) · order pushed to ERP (simulated) · confirmation email to the customer · company changes from *Prospect* to **Active Customer**.

> **Demo tip:** the default machine payment schedule is 30% / 60% / 10%. To show the finance step, edit the schedule so the advance is below 30%.

Step 10: Contract, payment, dispatch and installation

Action	Responsible	Condition
Generate Sales Contract → **Send for E-signature** → **Sign Contract**	Karan / Rohan / Suresh	Order approved; a signed contract can't be regenerated
Record Receipt (advance and milestones)	Swati (Accounts)	Order approved; amount up to the balance; date not in the future
Start Processing → Ready for Dispatch	Rajesh (SCM)	Order is Confirmed or Payment Received
Record Dispatch → **Confirm Delivery**	Rajesh / Meera	Ready for Dispatch, then Dispatched
Start Installation → Mark Completed	Meera / Administrator	Machine orders. Consumable orders complete straight after delivery.
Hold / Cancel order	Request with reason (5+ characters), then approval	Only before dispatch

Status flows

Record	Status flow
Lead	New → Contacted → Qualified (converted to Opportunity) I Nurture I Disqualified
Opportunity	Needs Assessment → Demo/Sample → Proposal/Quotation → Negotiation → Won I Lost
Quotation	Draft → Pending Approval → Approved → Sent → Under Negotiation → Accepted I Rejected I Expired
Sales Order	Pending Approval → Confirmed / Payment Pending / Payment Received → Processing → Ready for Dispatch → Dispatched → Delivered → Installation → Completed (Hold / Cancelled with approval)

Running the demo

1. Before each demo: **Settings** → **Reset demo data**.
2. Switch users in this order: Karan → Rohan → Suresh → Karan → Rohan → Swati → Rajesh → Meera.
3. After every hand-off, open the bell icon to show the notification the next person received.
4. To show the system enforcing its rules, try one of these blocked actions:
   - Create an opportunity from a **New** lead
   - Move an opportunity to Negotiation without a quotation
   - Approve your own quotation
